

ISLE OF MAN FINANCIAL SERVICES AUTHORITY

Supervisory Methodology Framework

19 May 2023

Agenda

- Background
- Impact Assessment
- AML/CFT Risk Assessment
- Supervision Structure
- Engagement Model
- Assessing Risk
- Governance

Background

Authority Strategic Plan - 2018-2021 & 2021-2024

- Strategic Priority Number 2 - Supervisory Methodology
- Project established - June 2016.

Key project components:

- Establish a risk based supervisory methodology framework
- Use “Impact” as an overlay to determine the engagement model
- Develop a risk universe to be applied to all regulated entities
- Record and manage risk consistently

Aim:

- Risk at the centre of a supervisor’s mind
- Assess risk on a forward looking basis with greater use of supervisory judgement.

Focus:

- Addressing the most important risks posed by regulated entities to the Authority’s supervisory objectives.
- Identify areas of emerging risk – supervisors intervene early and prevent risks from crystallising.

- Critical for Authority to have adequate knowledge of regulated entities who have the greatest capacity to negatively impact the Isle of Man economy.

Background – Ongoing Developments

Why?

- Require a consistent framework for the Authority to supervise across all regulated sectors.
- To facilitate supervisory planning
- Enable the Authority to have defined understanding of priorities.
- Assist the Authority to set parameters around risk appetite.
- The Authority has finite resources

Impact or Risk Driven

Impact Assessment

High
Impact

Individual capacity to cause **significant** disruption to the Isle of Man financial system and wider economy.

Medium
Impact

Individual capacity to cause **moderate** disruption to the Isle of Man financial system and wider economy.

Low
Impact

Individual capacity to cause **no, or only minor** disruption to the Isle of Man financial system and wider economy.

AML/CFT Risk Assessment

There is an **imminent risk of significant harm or loss to consumers or ML/TF threat occurring** without critical and immediate corrective action being taken.

There is a **risk of significant harm or loss to consumers or ML/TF threat occurring** without corrective action being taken.

There is a **low to moderate risk of significant harm or loss to consumers or ML/TF threat occurring.**

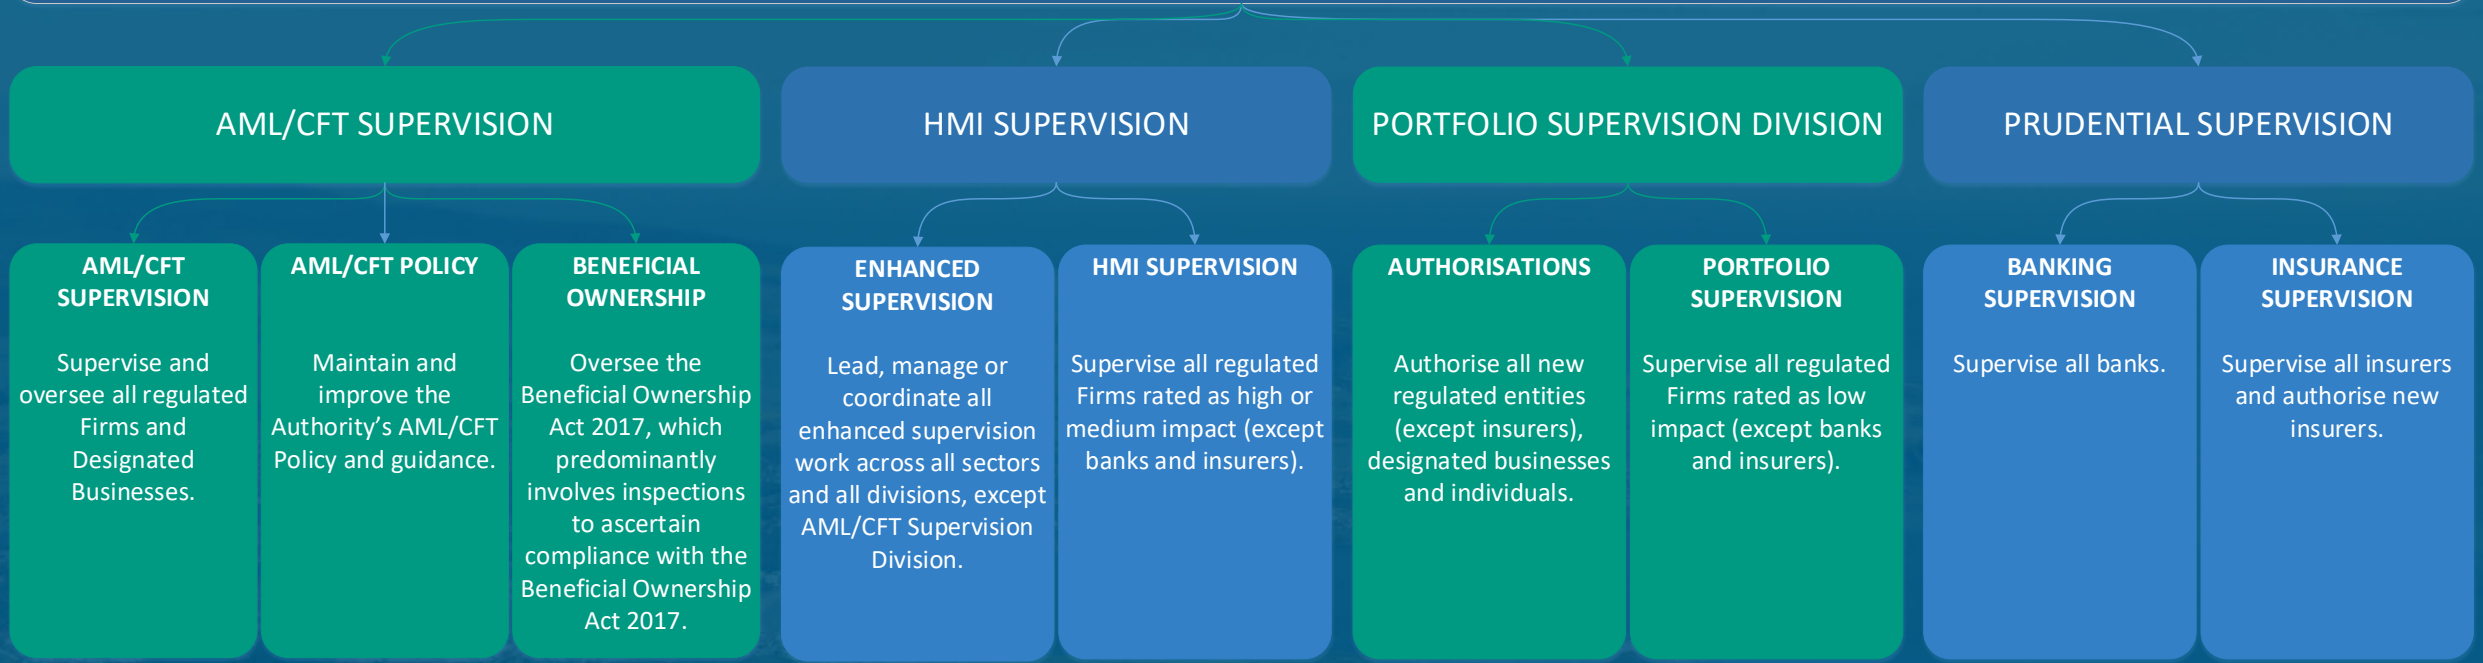

There is **minimal risk of significant harm or loss to consumers or ML/TF threat occurring.**

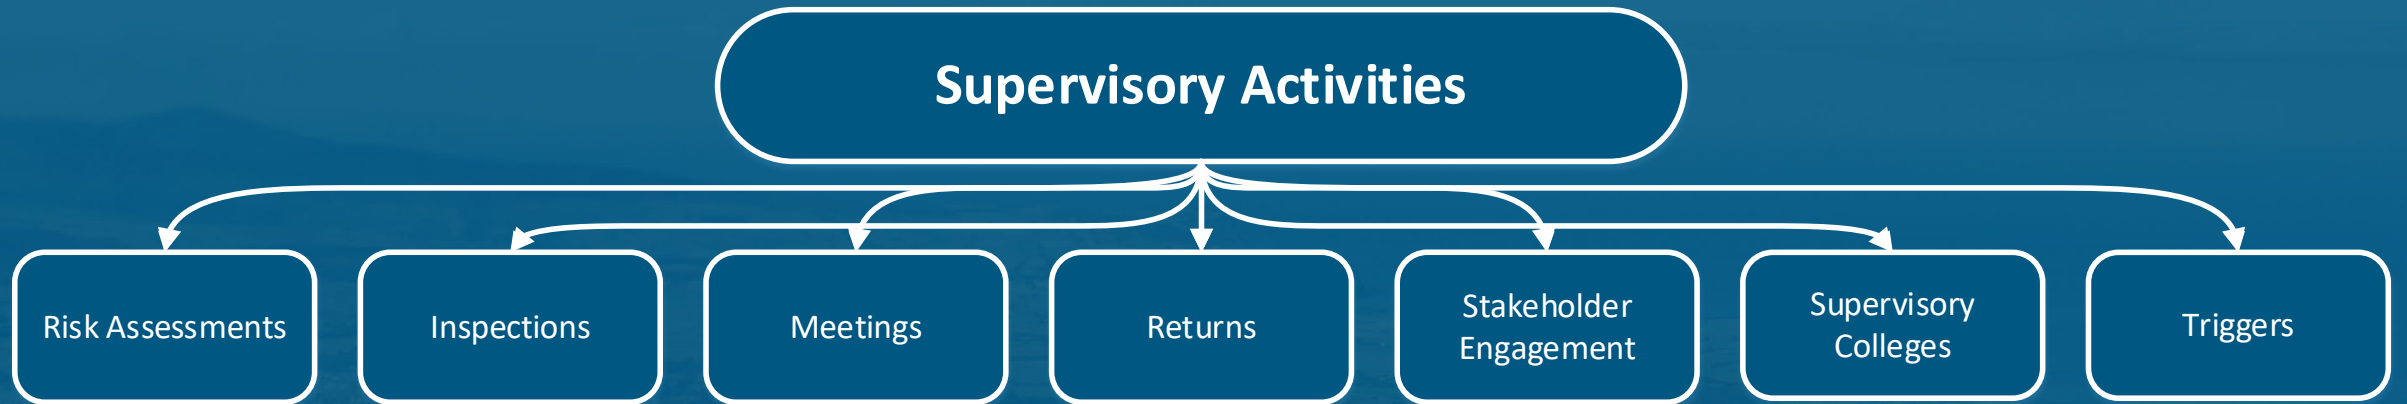

Supervision Structure

SUPERVISION DIVISIONS

Regulatory Toolkit

Overview

Assessing Risk

High Risk

Inherent Risk - In the absence of the risk being controlled and managed, or urgent/significant remediation, the probability of harm or loss to consumers or ML/TF threat occurring is considered to be **very likely**.

Residual Risk - There is an **imminent risk of significant harm or loss to consumers or ML/TF threat occurring** without critical and immediate corrective action being taken.

Medium
High Risk

Inherent Risk - In the absence of the risk being controlled and managed, or remediation, the probability of harm or loss to consumers or ML/TF threat occurring is considered to be **quite likely**.

Residual Risk - There is a **risk of significant harm or loss to consumers or ML/TF threat occurring** without corrective action being taken.

Medium
Low Risk

Inherent Risk - In the absence of the risk being controlled and managed, or minor remediation, the probability of harm or loss to consumers or ML/TF threat occurring is considered to be **small or unlikely**.

Residual Risk - There is a **low to moderate risk of significant harm or loss to consumers or ML/TF threat occurring**.

Low Risk

Inherent Risk - Even in the absence of the risk being controlled and managed, the probability of harm or loss to consumers or ML/TF threat arising is considered to be **very unlikely**.

Residual Risk - There is **minimal risk of significant harm or loss to consumers or ML/TF threat occurring**.

Governance

A healthy culture of challenge is essential for effective and consistent supervision, in order to achieve this the Authority has established Governance Panels (“Panels”). The Supervisory Methodology Framework operates four types of Panels, all of which have a purpose of facilitating cross-divisional challenge and driving consistency of approach to supervision, supporting the Executive in satisfying itself that the Authority is exercising its judgements in a fair, proportionate and consistent manner. The specific purpose of each Panel is to:

- Provide challenge in respect of appropriate usage of the regulatory toolkit on matters of material concern, the possibility and appropriateness of remediation, and, reach consensus in respect of Enforcement Referral recommendations;
- Review and agree proposed Impact Ratings;
- Review and challenge the robustness and adequacy of Firm risk assessments and, where applicable, risk mitigation programme; and
- Identify and scrutinise processes that require consistency improvements.

Next Steps

**Data
Automation**

**New Supervision
Structure – 3 April 2023**

**New Statistical
Returns**

**Transition
commenced**
